

Getting started

✓ Here are some tips to get you started. You can edit this page to see how it works!

On this page:

- [1. Create a page](#)
- [2. Add to your page](#)
- [3. Organise your pages](#)
 - [Change the page order](#)
 - [Add labels](#)
 - [Make templates](#)

1. Create a page

- Click "Create" and select "Blank Page" to create your first page.
- New pages are created as children of the page you are currently viewing.

2. Add to your page

- Click "Edit" to enter the Confluence editor and use the page layouts feature to structure your content using sections and columns.
- Use headings to format your text and drag and drop images into your page to provide visual interest.
- Click "Insert" and select "Other Macros" to add macros for navigation, special formatting and other media.

3. Organise your pages

Here are some tips for organising your content.

• Change the page order

The sidebar on the left displays your pages in a hierarchy. If you have Space Administrator permissions you can click "Space Tools" > "Reorder Pages" to move pages around.

• Add labels

Labels help keep pages organised and make it easier for you to find the information you need. Click "Labels" at the bottom of a page to add or edit. The "Related pages" section on this page uses labels too!

• Make templates

Standardise and speed up the page creation process with templates. You can create and format a template with page layouts, standard headings and instructional text for hints and guidelines. Check out our sample page on "[Making a template](#)"
